THURSDAY, DECEMBER 13, 1744.

*Extract of a Letter from an Officer in the Sardinian Service, dated at Demont, Nov. 18, 1744.*

HERE never was any Place more provided with greater Precaution than this Fortress; and it is certain, that the French never discover'd their Ability, as Engineers, in a more extraordinary Degree. All the Mines, taken together, amounted to Fourscore. They were well provided with powder, and every Thing so disposed, that there seemed not the least Reason to doubt that they woud all be blown up; but it so fell out, that no more than took Effect, by the cutting the Matches from the fuses; by which Means the best Part of the Fortifications have been saved from Destruction. But as are now safe, and at Leisure; and as, without doubt, different Descriptions of this Matter, will be given Foreign Countries, it will not be amiss to enter into a short Detail of the whole Affair.

The Enemy having left in the Fort a Detachment 200 Men to cover the Engineers who were to set fire to the Mines, march'd to a certain Distance, before the Signal was given for the Engineers to perform their Work. When they had set Fire to the Mines, they all march'd with the utmost Expedition; but as they were going out of the King's Gate, the King under it blew up, and not a Man, but the King de Beauvois, escaped. Our Volunteers, and the Company of Bernes, seeing they had nothing to fear but from the Mines, advanced boldly, and entered the Fortress, in order to cut off the Trains. Two of a Trainman of Coni, and Lieutenant Oubate, the first that enter'd it, and gave Example to the rest by their Intrepidity: The Lords Galeani and Cossi, with severall of their Friends, went in next; to these Twelve Persons we owe the Preservation of this important Place.

It will be proper to give here a distinct Account of what is ruined, and what saved. As to the former, King's Gate, and the Governor's Palace, are entirely destroyed; as is likewise the Curtain on the Side of the Town, the Angle on the Side of Podio, and that over the Village. The Work over St. Marcelline, which was composed only of Fasernes, was burnt. All the rest of the Fortress in general remains entire, particularly the great Cistern, and the two Magazines of Powder, which last were preserved by four Grenadiers of the Regiment of Lombardy, who cut off the Matches that would have set Fire to the Mine under them, in less than a Minute. It is therefore abundantly certain, that before the Spring, we shall be able to put this Place in a good Posture of Defence; and to find the Enemy sufficient Entertainment, if they should attempt this Road again in the Summer. So loud here, besides 18 Iron Cannon, 400 large Calib. 2000 Bullets, and 10,000 Fuzils; the Commander des Roches, the same Day carried off four pieces of Brass Cannon from the Enemy, after having sent the Corps that escort'd them. The Chevalier de la Motte, at the Head of his Corps of Warrasins, supported by a Body of our Militia, attack'd the Bridge over the River, upon which the Enemy had upon the Stura; but the Princes of Orange, and the Duke of Savoy, coming down upon him, with a great Part of their Forces, he was obliged to abandon his Enterprise. The Highnesses marched on Foot from Demont, to Turin, that they might encourage their Troops; and immediately, on receiving the Signal, proceeding to the Front. The Guard is composed of 600 Grenadiers, belonging to the Piquets, and the Miquelets; Messieurs Chaussier, Riche, and Nelli, are in full Pursuit of the Army, with their Light-Arm'd Troops; and the first of them has already passed the Col de Mulo. We may doubt their giving a good Account of their Expedition, and bringing back with them a considerable Part of what Baggage the Enemy has yet left.

## L O N D O N .

They write from Chambery, that the Epidemic Disease that carries off such vast Numbers of Cattle, consists sometimes in a Bladder of Water gathering on the Brain; and at others, in a White Substance overspreading their Tongues; which, in a few Days, turn black, and mortify. As to the First, they have, as yet, found no Remedy; but with Regard to the latter, if the White Skin be opened in time, with a Botkin, and the Wound wash'd with Vinegar mix'd with Pepper, Garlick, and Sempervive, it very seldom fails of stopping the Disease, and producing an effectual Cure.

We learn by private Letters from the Hague, in Date the 12th Instant, N. S. that they had Advice from Paris, that the Duches de Chateauroux died there on the 4th, of a high Fever.

According to the last Advices from Brussels, a Resolution has been taken, to march, at the Request of the Elector of Cologne, a considerable Body of Troops to cover his Dominions.

The Ludlow Castle Man of War, with about 60 Sail of Ships from Holland under her Convoy, is arrived in the Humber.

The Three Brothers, Fea, from Amsterdam, is arrived at Newcastle. She was, in her Voyage thither, attack'd by a French Privateer of four Carronades, besides Swivel Guns, and about 70 Men; but after exchanging a few Broadsides, the Privateer shew'd off.

The Expedition Privateer, Capt. Bawden, and the Adventure Privateer, Capt. Mitchel, were both taken by a St. Malo's Privateer the 27th of November.

The Alfred, Capt. Judd, from Maryland for London, is said to be taken by the French, and carried into Brest.

Twenty-four Sail of Ships sailed from Newfoundland the 19th of November, for England, some of which are arrived in the Western Ports.

Early Yesterday Morning two Lightermen belonging to Mr. Wallinger, a Stone Merchant at Westminster, were unfortunately drowned near Mortlock, by the Barge sinking when they were asleep, as is supposed, in the Cabin, the Vessel being at Anchor.

Yesterday was held a Court of Directors of the East India Company, when Capt. Thomas Field, Commander of the Royal George, bound for Coast and Bay; and Capt. George Jackson, Commander of the Essex, bound for Mocha, took their Leaves of the said Court, in order to proceed on their intended Voyages.

Yesterday the following Numbers were drawn Prizes in the State Lottery; v. z. 24,831, 19,274, 30,049, 7,159, 43,886, 34,356, 59,407, 100l. each.

W<sup>h</sup>ile less by an Establishment, which has been long in Force in the Royal Navy, a Schoolmaster is allowed to each of his Majesty's Ships of the Third, Fourth, and Fifth Rate, with the Allowance of Midshipman's Pay, and Twenty Pounds a Year besides for his Encouragement; but an Opinion having prevailed of late Years, that since the Erection of a Royal Academy at Portsmouth, for Educating and Training up Gentlemen's Sons for his Majesty's Sea Service, the Establishment of Schoolmasters has been abolished; which Opinion being hurtful to his Majesty's Service, by preventing Persons from applying to be employed in that Capacity, and thereby depriving the Youth, who serve on Board his Majesty's Ships, of the necessary Assistance for perfecting themselves in the Art of Navigation: The Lords Commissioners of the Admiralty think proper to order this publick Notice to be given, that the Establishment of Schoolmasters on Board the Ships of the Royal Navy is still in Force; and that if Persons properly qualified, by having passed an examination at Trinity-House, will apply to this Office, they shall meet with all due Encouragement, and be warranted as Schoolmasters, on board such of his Majesty's Ships as may be in want of them.

### SCHWANBERG's Liquid-Shell FOR THE GRAVEL and STONE.

**A**s the Principle of Mrs. STEVENS's MEDICINE for the GRAVEL and STONE is well known to be the Alcian Soap and the calcin'd Shells, which promote the Dissolution thereof, and for the Discovery of which, the Parliament of Great Britain granted 5000l and as this is esteemed the best Medicine ever yet publish'd in the above Cases, notwithstanding the enormous Dose, it is to be presumed, that if the internal Essence, which is Salt, was to be dissolved into a Liquid, it would be more efficacious than the crude Medicine: Now, that there is such a dissolution to be had, of which, from ten to thirty Drops is a pleasant and safe Dose; those who are afflict'd with the Gravel and Stone may be convinc'd, by taking them in a Glass of genrous Wine; and are so innocent, that an Infant in the Month may take 'em.

Note. They are to be had for one Shilling and Sixpence the small Vial, at the Golden Dove, under the Statuary, facing Servants Inn in Fleetstreet; where an Abstract of its Virtues may be had gratis.

It keeps good for many Years, at Sea or on Land, in Climates; therefore must be universally Useful.

The Doctor not only obtaining his Majesty's Letter Patent for the sole Vending of this most Excellent Medicine, also a Clause in a late Act of Parliament, exempting this Medicine from the Inspection of the Censor of the College of Physicians, to which all other Medicines are liable.

N. B. The late Learned Dr. CHEYNE, in his English Piece, entitled The Natural Method of curing the Diseases of the Body, &c. prefers EATON'S STYPTICK to Helvetic or other Stypticks; and speaks of it as follows: — Every one knows the agglutinating Quality of sweet Blood, and I apprehend it is to this, that EATON'S Styptick owes its mild, soldering Efficacy. — It is more mild, soldering, and soft, than the mildest Steel Preparations, and used to patch a Hole, or glew up a Rupture, or to give Ease to the acrid and inflam'd flowing Blood of the Patient. — says, he is confirmed in this by a Physician of great Reputation, and Candor, who has great Opportunities of seeing in Cases, by his Practice in Midwifery. See p. 18.
